3. Always wear appropriate personal protective equipment: gloves, hearing, and eye protection at a minimum.
4. Use caution when lifting components into place, make sure components are secured during installation.
5. If drilling is required eye protection is especially important to avoid injury. Also be sure to thoroughly inspect the area around where you are drilling to avoid damaging wiring or other components.
6. Use extreme caution when cutting or trimming is required.
7. Please follow the recommended specifications for torque on all hardware. We recommend checking the torque during regular routine maintenance on all aftermarket accessories.
8. Use caution when routing electrical cables and lines. Avoid moving parts, components that become hot and rough or sharp edges.
